

TENACIOUS EYE

9175 Glen Arbor Road
Ben Lomond, CA 95005-9516

CARE FOR YOUR NEW TATTOO!

- Remove bandage and plastic wrap after first hour.
- Rinse & blot away excess blood & Vaseline, and apply a thin layer of A&D ointment daily.
- Use ice to reduce redness, swelling, & itching.
- Listerine or Witch Hazel will relieve itching.
- Don't scratch or pick at new scab.
- Avoid direct exposure to sun, chlorine, & salt water for at least two weeks. Do let the wound get air to heal properly.
- After healing, use a sun block lotion to reduce fading while your tattoo is exposed to the sun.
- Healing time is usually one to two weeks. Skin peeling is normal during this phase.
- Contact a physician if you experience any unusual symptoms, such as increased pain, elevated body temperature, purulent drainage, swelling, heat, discharge, fever, red streaks spreading from the new tattoo to the heart, or any other signs of infection or allergic reaction.
- Feel free to call with any questions you may have.

(831) 336-9222 8a.m.-8.p.m

All touch ups (redrawing lines or re-coloring) are free

Thank-you for choosing **Tenacious Eye!**
